Primary Examiner, Art Unit 2176

1. This action is responsive to the following communications: Amendment After Final, filed 09/03/2009.
2. Claims 1, 8, 11-13, 21, 24, 26, 45-50, 56, 57, 61, and 62 are allowed. Claims 1, 13, and 62 are independent claims.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The prior art, U.S. Patent No. 6,509,912 to Moran, teaches domain objects, programmatically equivalent to the claimed property values, which are context specific representations of information that are used in a freeform graphics system (Abstract, Figs. 22 and 26, col. 2, l. 28-57; col. 13, l. 13-col. 14, l. 23; claim 1), and that domain objects are represented in the system by a graphic objects, i.e., icons, representing an instance of the domain object.

U.S. Patent No. 6,411,732 to Saund teaches an electronic ink interface board for rendering a file save interface, the input system configured to receive in electronic ink format a property value of a document or file on or accessible by the computer system in the file save interface; Saund teaches that the electronic ink board allows a user to draw interface elements representing save actions (Fig. 31, 33) and performing file save commands for electronic ink property values in the save interface (col. 6, l. 45-col. 7, l. 64). Saund teaches rendering an electronic ink file save interface and saving an image file or text (col. 7, l. 5-38).

U.S. Patent No. 6,028,604 to Matthews, et al., teaches a preview data structure to provide for a variety of multimedia presentations, which includes file types and icons to display information and text associated with an application, and which may display a limited information portion of the file (col. 15, l. 37-col. 16, l. 39). Matthews teaches retrieving and playing the preview files, and if the selection was chosen by the user for execution, the selected application, i.e., file, will be retrieved (col. 16, l. 1-18).

None of the prior art references teach the limitation of independent claim 1, *...wherein the rendering system renders the stored property value in accordance with the format policy as part of a file preview operation, the rendering system converts the property value into a machine-generated text when the format policy dictates rendering of the property value should be of a machine-generated text...* (Claim 1). Independent claims 13 and 62 contain similar limitations which are not disclosed in the prior art.

It would not have been obvious to one of ordinary skill in the art at the time of the invention to have combined the prior art of record to arrive at applicant's claimed invention, because the above claimed features are not disclosed in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
